Professional Summary

Computer Science graduate with practical experience in deploying ML models using AWS SageMaker, building NLP and summarization tools with Google Gemini API, and analyzing data using Python. Skilled in TensorFlow, PyTorch, and data pipeline development. Completed internship with real AWS deployment experience and led multiple data-driven academic projects.

Education

Chalapathi Institute of Engineering and Technology
BTech in Computer science and Engineering
GPA: 7.9

Guntur, Andhra Pradesh
September 2020 - April 2024

Intermediate
Noble Sai Junior College
GPA: 9.13

Dachepalle, Andhra Pradesh
June 2018 - Feb 2020

SSC(10th)
ZP High School
GPA: 9.7

Dachepalle, Andhra Pradesh
June 2017 - Mar 2018

Experience

AI/ML Virtual Intern

AICTE Eduskills | AWS Academy

May 2023 – July 2023

- Developed and deployed 3 supervised ML models on AWS SageMaker with real-world datasets (15,000+ rows).
- Improved prediction accuracy by 18% after hyperparameter tuning and cross-validation.
- Evaluated model performance using confusion matrix, F1-score, precision, and recall.
- Automated end-to-end ML workflows using AWS SageMaker, Lambda, and S3, reducing manual deployment time by 40%.

Projects

1. ETL Data Pipeline for Sales Analytics

- Built an end-to-end ETL pipeline using PySpark to process 1 lakh+ retail sales records.
- Performed data cleaning, null-handling, categorization, and feature engineering using Spark DataFrame APIs.
- Stored cleaned data in AWS S3 and generated business insights like top-selling products, revenue trends, and user behavior.
- Improved data processing speed by 60% compared to pandas-based processing.

2. AI-Powered Chat, Web & YouTube Summarization Tool

- Designed an AI-powered summarization pipeline using Gemini API, Whisper, DuckDuckGo and RAG for fast content analysis, automating video and web summarization in under 5 seconds and reducing manual review time by 70% extraction.
- Summarized 10+ websites and YouTube videos (10 mins each) in <5 seconds using Python and Flask APIs.
- Improved productivity by 70% by reducing content review time through automated, structured summaries.
- Integrated RAG with Vector DBs to enable PDF/document upload and intelligent Q&A, allowing users to query specific sections of content.

Skills

- Languages & Programming:** Python, SQL
- ML & AI:** Scikit-learn, TensorFlow, PyTorch, RAG, LLMs
- Data Analytics & Visualization:** Pandas, NumPy, Matplotlib, Sklearn, PySpark
- Tools & Platforms:** Git, GitHub, Jupyter, Google Colab, VS Code

Certification

- [Data Science & Machine Learning](#) - Cranes Varsity, Bengaluru.
Trained in Python, RDBMS, Exploratory Data Analysis (EDA), Power BI, and Machine Learning techniques.
